

OUTLINE India
Social impact through Data

CARPE DATUM

What We've Been Up To

Study on parental perceptions of infrastructure and student achievement in schools

We partnered with the **Centre for Civil Society** to examine the impact of information about school on parental choice.

The study, based in Hastal Village in West Delhi, includes a learning assessment of Students and a survey of School leaders.

Deep dives on Water and Sanitation Interventions

We are working with **Dasra** to study the work of eight partners of the **Bill and Melinda Gates Foundation**, in the Water and Sanitation space. The study, based in Gujarat and Andhra Pradesh, will build an understanding of interventions to enable knowledge exchange, combat information asymmetry, and foster advocacy.

Outline India's study on Aadhar Card was reported on

Drone technology Pilot study profiled as success story by

We're being published!

This internally-funded survey investigated public perceptions of Aadhar in Delhi, investigating how respondents received the card.

Our study explored the Potential of Geospatial Technology in social research and was recognized as a use of Geospatial Technology to support infrastructure.
