

# OUTLINE INDIA

## Message

Dear Ankeshita,

As the temperature picks **up**, so does our pace!

We have hit the field in **Gujarat, Delhi, Haryana, and Jharkhand**, conducting **Impact Evaluations** to help chart development strategies and engaging with stakeholders to understand the grassroots challenges.

We move ahead in strengthening the **ESG framework** as we explore partnerships with international organizations and other institutional stakeholders to support India's G20 chairmanship and the W20 engagement group for **gender equity, empowerment, and skill development**.

Read on for exciting news from our projects and discussions as we continue our work in **Social Impact through Data**.

## Stakeholder Engagements

## TB Project Training

Field updates!

As our teams understand the impact of TB care from various stakeholders, here's a glimpse of the grassroots engagement for quality **data**.

This project with the **Indian School of Business** across **Gujarat** and **NCR** was conducted wherein our team surveyed 30 doctors and 120 patients to support our **Impact Assessment** to understand the impact of TB care and treatment in the private healthcare system, and how healthcare schemes like **JEET**, and private healthcare providers like **TATA1mg** have fared in the fight to eliminate TB from India.

## Hear it from team OI

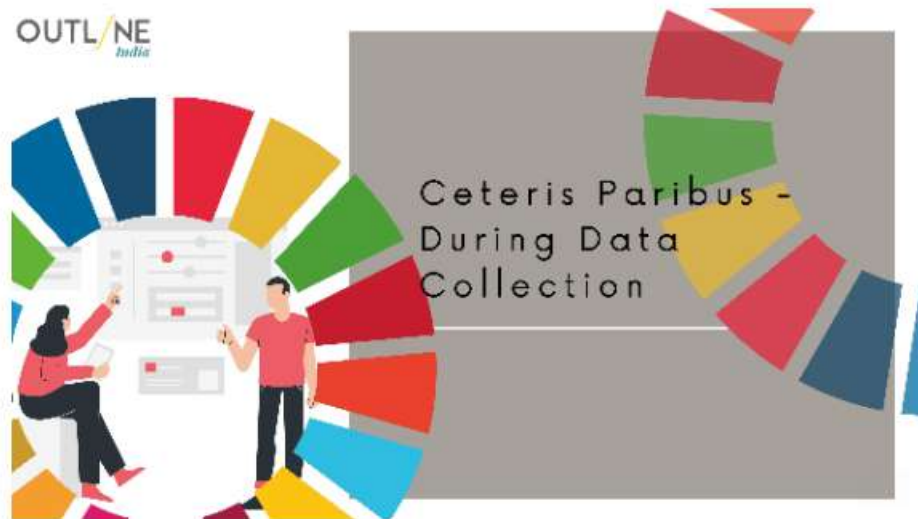

April sees a celebration of **World Health Day** and this year's theme 'Health for All', perfectly aligns with our goal of working with stakeholders to strengthen the public health space. Our researcher Ishita Srivastava, shares her experience from a field visit across Faridabad and Gurugram.

Watch

## Supply chain for mineral mining in Jharkhand

Our recent visit to **Jharkhand** included conversations with **Kailash Satyarthi Children's Foundation**, **ILO partners**, and communities who engage in local activities outside of traditional farming.

Classroom learning versus field application, we consider the concept of **“All things constant”** in the realm of **data collection**. From theories and concepts, we discuss various factors when it comes to generating insights from the grassroots.

### Exaggerated Effects in the Sphere of Agriculture

This research is rooted in the understanding that **climate change** is accelerating year by year and has already exacerbated pre-existing vulnerabilities of the most marginalized communities. With this research, **Outline India** is hoping to **uncover some of these exaggerated effects in the sphere of agriculture** and aims to **understand the effects of climate change on smallholdings, women, and SC/ST farmers.**

## UTTAR PRADESH

This summer we are embarking on an ambitious **8-state mission**. We will be working across **Andhra Pradesh, Maharashtra, Assam, Uttar Pradesh, Delhi, Haryana, Rajasthan, and Kerala**.

Reach out to us if you -

- 1- You have extensive experience working in the field and managing **data** collection exercises - Field Manager, Project Manager, and Field Coordinator applications are welcome!
- 2- Would like to partner with us in one or more states on the **data** collection facet
- 3- Speak the local language and would like to work as a project consultant
- 4- Understand how to build research designs and have a good understanding of monitoring and evaluation
